

ERAAO ACADEMY

THE ULTIMATE COURSE MODULE

Basic English • English for Freelancers • Advanced English

A complete 3-month, 3-classes-per-week roadmap for each course level,
built entirely on the ERAAO Learning Cycle:

Understand → Notice → Build → Practice → Use → Recall

Prepared: September 2026

The ERAAO Core Learning Cycle

Every class in every course — regardless of level — moves through the same six stages. The student never has to memorise this cycle; they simply experience it, class after class.

Stage	What Happens	Student Outcome
Understand	English is introduced through context, sound, situation and meaning	"I understand what this means."
Notice	Student recognises recurring words, structures and patterns	"I can see how English works."
Build	Student constructs their own sentences	"I can make my own English."
Practice	Controlled repetition and variation	"I can use it without struggling."
Use	Speaking / writing in realistic situations	"I can actually communicate."
Recall	Previous English is brought back repeatedly	"I remember it when I need it."

Academy-Wide Class Structure & Resource Policy

Weekly Class Rhythm (applies to all 3 courses)

Each course runs for 12 weeks (3 months) at 3 classes per week — 36 classes in total per course. Every single week follows the same three-class rhythm, so listening and speaking are never an afterthought — they are built into the routine from Week 1 to Week 12.

Class	Focus	What it Covers
Class 1	New Input	Understand → Notice → Build: the week's new grammar point, sentence pattern or vocabulary is introduced through context, not rules-first.
Class 2	Speaking Application	Practice → Use: students personalise the new pattern and speak it — drills, role-play, discussion, depending on the level.
Class 3	Listening + Recall + Review	A dedicated listening class built around a self-made audio, followed by recall of the previous 1-2 weeks and a short writing/homework hand-off.

Free Documents & Self-Made Listening Audio — Policy

- One free worksheet / PDF is released per module, on the first class of that module, so students always have something physical to practise with between classes.
- One self-made listening audio is released in Class 3 of every week (the dedicated Listening + Recall class) — never taught 'cold', always tied to that week's new language.
- Weeks that are flagged as a dedicated Listening-Focus module (Week 9 in Basic English, Week 7 in Advanced English) receive an extended 2-audio pack instead of one.
- Every course closes with a Certificate of Completion plus a summary/portfolio document in the final week.
- All free resources are cumulative — students keep every worksheet and audio file for revision through Recall classes and beyond the course.

Course 1 — Basic English

“Build a usable English foundation from the English you already know.” This is not English from A-Z — it turns the student's fragmented school English into one usable system.

Final outcome: the student moves from “I can speak English” to “I can express myself in English.”

Master Roadmap — The Full 9-Month ERAAO Journey

If a student takes all three courses back-to-back, this is the complete journey from zero system to natural fluency:

Timeline	Course	What They Achieve	Classes	Free Resources
Months 1-3	Basic English	Build the foundation — usable everyday English without memorised scripts	36	15 docs / 7 audios
Months 4-6	English for Freelancers	Communicate professionally, write proposals/emails, run client meetings	36	16 docs / 12 audios
Months 7-9	Advanced English	Move from constructing English consciously to expressing it naturally	36	16 docs / 13 audios

Grand Total	All 3 Courses Combined
Total Duration	9 months (36 weeks)
Total Classes	108 classes (36 per course)
Total Free Documents	47 worksheets / guides / packs
Total Self-Made Listening Audios	32 audio files
Certificates Issued	3 (one per completed course)

Instructor Implementation Checklist

Before Each Course Starts

- Record and label all self-made audios in advance where possible (name them Audio #1, #2... per course, matching the schedule table).
- Prepare the module worksheet for Week 1 and the course calendar PDF before the very first class.
- Confirm the fixed 3-classes-per-week slot with the student (e.g. Mon / Wed / Fri) so Recall spacing stays consistent.

Every Week

- Class 1 = New Input (Understand → Notice → Build) — never open with a grammar rule; open with context or sound.
- Class 2 = Speaking (Practice → Use) — the student must produce personalised language, not repeat memorised lines.
- Class 3 = Listening + Recall — play that week's self-made audio, then run a 5-10 minute recall of the previous week's language before releasing new homework.

End of Each Course

- Run the Week 12 final review/simulation/integration class as a visible demonstration of progress, not a test.
- Issue the Certificate of Completion and the course's summary/portfolio document.
- Log which of the free documents and audios were actually used, to refine the pack before the next cohort.
